

## Cerulean's CETI 8 just got better!

The successful CETI 8 now has upgrades that can be fitted on-site fast and with ease. These upgrades can be ordered today and allow you to expand the functionality of the e-cigarette testing instrument:

- Angled vaping kit
  - allows the user to hold the product at varying angles with the possibility to vape at 15° intervals through 180°
- Liquid impinger capture system
  - the capture kit is used for collecting carbonyls and volatile organic compounds easily and safely
- Button activation kit
  - expand the product range that can be vaped by using the button activation kit. The user can define the vape dwell time to ensure the e-cigarette device is primed prior to vaping
